

PRODUCT ADVISORY NOTICE

To: All Customers

From: Don Fishel, VP Sales & Marketing

Date: July 12, 2013

Subject: Manufacturing Location Change

This Product Advisory Notice is to alert you that R•O•M Corporation is relocating the manufacture and service of certain lighting products from Belton, MO to its Nesconset, NY operation. Please forward this notification to the appropriate person(s) in your organization.

Description of Change

R•O•M is relocating the manufacture and supply of the R•O•M (formerly Havis) branded scene lights, replacement parts and accessories (e.g., mounts, poles, etc.) from its Belton, MO facility to its Nesconset, NY facility. Some duplicate capacity will remain in Belton, MO through October 2013 as a secondary backup in capacity and capability. R•O•M Belton customer service will work closely with customers and FRC sales and customer service through the relocation to help ensure a smooth transition.

Reason for Change

R•O•M's addition of Fire Research Corporation provided an expanded lighting product offering and extended capabilities including an electrical engineering department, in-house test lab and an operation that manufactures electrical assemblies from the PCB level up which provide excellent product development and customer support. Customers will benefit from a single point of contact and order for a complete line of scene lighting products and minimized freight costs by consolidating light orders into fewer shipments.

Effective Date

Beginning **Monday, August 12, 2013** purchase orders, customer service enquiries and technical service should be directed to FRC at the following:

Email: ORDERS@FIRERESEARCH.COM
Fax: 1-631-360-9727
Phone: 1-800-645-0074 and ask for sales
