

Advanced Feature Controller (AFC)

Integrated "Auto-Start" Option

Simplify standard operation procedures with the optional "Auto-Start" programmable power-up mode. Activated via any electrical signal, such as a fire pump shift, this feature eliminates steps by the operator by automatically arming the foam system. Ideal for departments utilizing foam on initial attack and perfect for compressed air foam systems (CAFS). Also, the AFC allows for simultaneous use of the Concentrate Management System and Remote Start/Stop options.

Features & Benefits:

- Increased firefighter safety
- Same FoamPro ease of operation and dependability
- One less procedure required
- Complete integration of operational functions
- Ideal for CAFS
- Simultaneous operation of Remote Start/Stop and Concentrate Management System
- Easy to retrofit

Full-time functions of Remote Start/Stop and Concentrate Management Systems are now available with additional port.
