

# Product Change Notification

**Overview:** Please be advised that the following is notice of change to the Fire Research TankVision display.

**Products Affected:** All TankVision full size primary and remote displays. (This does not effect cab miniatures or remote light drivers.)

This includes the following models:

WLA200, WLA260, WLA270, including horizontal display options

**Change Description:** The display bezel has been changed from inward curved sides to straight sides. New displays will be direct replacements in all orders starting on or about 01MAR06.

**Reason For Change:** Part of the ongoing process to improve FRC manufacturing and production operations. Addresses customer concerns over tight tolerance on panel cutout required with curved bezel version.

**Replacement Product:** New TankVision displays have the same form, fit, and function and will be direct replacements. There are no changes to the electrical or mechanical requirements (cutout dimensions remain the same).

\*Important Note: The new bezels have slightly rounded radius on the underside where the bezel meets the housing (this was a machined corner on the old type). It does not effect the cutout dimension but, it may effect the inside dimension of a pre-cut gasket.

**References:** The following document is available with images that show the old and the new bezels. PCN-0603-01-IMG

**Response:** No response to this notification is required. Requests for additional information should be directed to an FRC sales representative at 1.800.645.0074.

FS 24MAR06

# Tank Vision Bezel Difference

The display bezel has been changed from inward curved sides to straight sides on all WLA200, WLA260, WLA270 models. New displays will be direct replacements in all orders starting on or about 01MAR06.
