

Product Change Notification

Overview: Please be advised that the following is notice of change to the Fire Research EDGE Pressure Governor product line.

Products Affected: All EDGE Pressure Governor models.

This includes the following FRC current part numbers:

PEA101-A00

PEA102-A00

PEA103-A00

PEA104-A00

PEA105-A00

PEA110-A00

(And all pre-2005 part numbers: PE 1-iS, PE 2, PE 3, PE 4, PE 5)

Change Description: The above models are being discontinued.

Reason For Change: The EDGE pressure governor was released in 1998 as a state-of-the-art pump controller. It has been rendered largely redundant by governors and displays using newer technologies. (The main microprocessor used in the EDGE is an older type which is now getting harder to find.)

Replacement Product: FRC will continue to provide service and parts for the EDGE series governors.

For replacements or new installations the InControl (TGA series) pressure governor provides all the same features with the addition of engine RPM and status displays.

*Important Note: The InControl is not a direct replacement for the EDGE. The panel cutout for the InControl is larger.

References: No references are applicable.

Response: No response to this notification is required. Requests for additional information should be directed to an FRC sales representative at 1.800.645.0074.
