

Product Change Notification

Overview: Please be advised that the following is notice of change to Fire Research products for Navistar engine.

Products Affected: All engine throttle and governor product lines that support the Navistar engines.

Change Description: We are adding new kit part numbers to support the 2007 Navistar MaxxForce DT, 9, and 10 engines. Existing kit part numbers for Navistar engines with RESCM are not changing but these will not work with the MaxxForce engine ECM.

Reason For Change: The MaxxForce engines use a new ECM that requires different control signals from remote engine throttles and engine governors.

Replacement Product: FRC will continue to provide all kits to support Navistar engines with a RESCM installed. The new kit part numbers for MaxxForce can be identified by a -D in the type code (last three characters) of the kit part number as follows:
