

Product Change Notification

Overview: Please be advised that the following is notice of change to the Fire Research PBA100 PumpBoss Governor product line.

Products Affected: All PBA100 models.

This includes the following current FRC part numbers:

PBA100, PBA101, PBA102, PBA104, PBA105, PBA108, PBA109, PBA110

Change Description: The above models are being discontinued.

Reason For Change: Part of the ongoing process to improve FRC products. The PBA100 is being replaced by new PBA models that will provide the more features with updated hardware and enhanced programming.

Replacement Product: Three new PumpBoss models are available. New features on all new models include separate buttons to select pressure or RPM control modes, a two line message display, a fourth LED bar graph display for transmission temperature, and a photo sensor that automatically adjusts LED intensity for day or night operations.

The PBA200 models use a 300 psi pressure sensor on the pump discharge for pressure control and are direct replacements for most PBA100 models.

The PBA300 models use a 600 psi pressure sensor on the pump discharge for pressure control.

The PBA400 models use two (2) 600 psi pressure sensors. One on the pump intake and one on the pump discharge. This dual sensor configuration provides improved defense against pump cavitations.

FRC will continue to provide service and parts for the PBA100 PumpBoss components.
