

# Product Change Notification

**Overview:** Please be advised that the following is notice of change to the Fire Research FDA300 FROG Three Phase Generator Display product line.

**Products Affected:** All FDA300 models.  
This includes the following current FRC part numbers:  
FDA300, FDA310 for all kilowatt ratings

**Change Description:** The above models are being discontinued.

**Reason For Change:** Part of the ongoing process to improve FRC products. All FDA300 models are being replaced by FDA700 models. The new model consists of a display module and main logic module. The separate logic module allows for easier installation by minimizing the length of wires run from the sensors. The connection from the logic module to the display is via a two wire data link.

**Replacement Product:** FRC will continue to provide service and parts for the FDA300 FROG components.

The new FDA700 FROG Three Phase Generator Display will be available September 2010 for replacements or new installations with the following FRC part numbers:  
FDA700 (generators rated from 10 to 135 kW; delta winding)  
FDA710 (generators rated from 10 to 135 kW; star winding).

\* When FDA700 models are used as a direct replacement for FDA300 models there is some new wiring required and the installation of the main logic module (mounting footprint for the display module is the same).

**References:** No references are applicable.

**Response:** No response to this notification is required. Requests for additional information should be directed to an FRC sales representative at 1.800.645.0074.
