# Product Change Notification

Overview: Please be advised that the following is notice of change to the following Fire Research 10 ft. sensor cables described below.

Products Affected: Any 10 ft. sensor cables terminating with a 3-pin Packard connector. (See the table below for the affected part numbers and the replacement part numbers.)

Change Description: Effective immediately, FRC has changed the connector style and cable for the 10 ft. sensor cable assemblies. The new connector is equipped with a cover that extends onto the wire sleeve. The new cable will have a white sleeve; the previous cable had a grey sleeve. The wire gauge, length and other parameters remain the same. This is the same form, fit and function as before.

OLD DESIGN

NEW DESIGN

Reason for Change: This change was implemented to better protect and act as a water seal. This redesign also helps to maintain the wiring integrity by preventing overly straining the wiring from tension, or pulling between the wiring and the connector.

Replacement Product: The following table is a list of the part numbers that were affected and their replacements. No form, fit, or function parameters have changed.

Orders received for the older part numbers will be changed to reflect the current replacement part numbers.

OLD PART NUMBERS	NEW PART NUMBERS	DESCRIPTION
XE-AM200S-C10A	XE-AM200S-C10B	CABLE AIR SENTINEL SENSOR 10-FT
