MODELS 200, 210, 230, 250
RECESSED MOUNT

INSTALLATION INSTRUCTIONS
Refer to the General Lighting manual or lamphead specific sheets for safety and maintenance.

Install Recessed Mount Models 200, 210, 230, 250
1. Measure and mark mounting location for cutout.
2. Cut out mounting hole.
3. Place the light in position to check for fit and mark mounting screw locations.
4. Double check the clearance around and behind the light housing. Recessed lights require a minimum of 3 inch clearance between wall insulation and the light housing.
5. Drill mounting screw holes.

Note: Wires may need to be connected before installing the recessed light.
6. Ensure that approved strain relief for the wiring is installed.

Note: Take steps to prevent dissimilar metal corrosion between the light housing and the screws. Apply a corrosion preventive coating to the screws and use the supplied plastic inserts (not included with the OPA230).
7. Secure the housing with mounting screws.

Wiring
12/24 VDC
Connect the BLACK wire to GROUND.
Connect the RED (or WHITE) wire to POWER.
120/240 VAC
Connect the GREEN wire to chassis GROUND.
Connect the WHITE wire to RETURN.
Connect the BLACK wire to POWER.
